Museum Description: This was a time when sculpture was beginning to move outdoors, both in and outside of Japan. Sculpture with an open feel was made from a variety of different materials, replacing traditional sculpture focusing on weighty solidity. Sculpture expanded spatially as it became larger and larger in size, and the term “environmental sculpture” emerged.

The use of a specific outdoor site as an exhibition space for sculpture was also in keeping with the times. This spot in Hakone offers hills, streams, and ponds, with views of the mountains on both sides and the sea in the distance at the horizon. From the outset, the site met several of the prerequisites for a Japanese Garden.
